

WinBacs:Docs

Cut costs, improve efficiency
and streamline your financial
document distribution processes

Cut costs, improve efficiency and streamline your financial document distribution processes.

Today's economic climate demands that businesses reduce overheads and work more efficiently. Organisations need to streamline the production and distribution of documents by removing manual processes from Finance and Accounting Departments.

Higher quality documents and lower cost distribution will add to your Return on Investment in payment automation.

If you use Bacs for your supplier payments (whether for utilities, purchasing, expenses or any other payment type), you will already be enjoying the benefits of lower processing costs, faster transaction times and greater security.

However, the majority of UK companies still print their business critical documents directly from their financial applications on to headed paper and rely on postal delivery.

These printed documents are typically:

- Expensive to print
- Unformatted in structure
- Slow and expensive to deliver

If the documents you produce are poor quality and do not get actioned in time, your business will suffer from delayed cash flows, increased supplier queries and high document production costs.

Documents: the true cost

- Documents cost upwards of £1 each to print and post
- 1 in every 20 documents get lost once they have reached their intended destination
- 14.4 million items of post go missing each year
- 87% of B2B communication is still done on paper

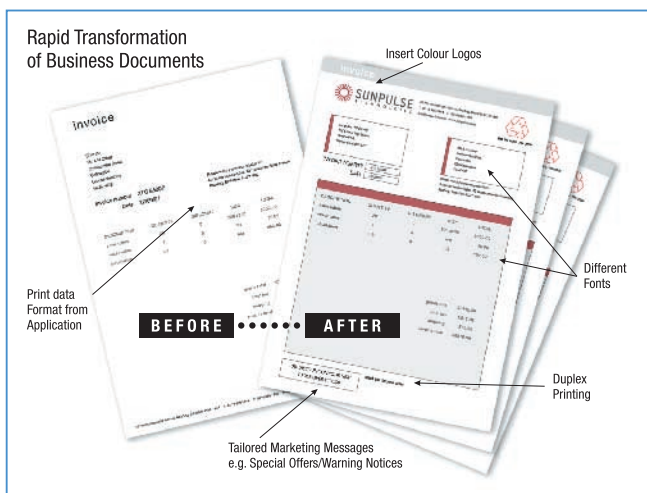

WinBacs:Docs from Bottomline Technologies removes costly manual processes, providing document formatting and delivery at the lowest cost – by email, fax or print.

WinBacs:Docs will benefit your business in three core ways:

- Documents go out with a more professional appearance: **stop printing straight from financial applications**
- Reduce the cost of delivering documents: **least cost distribution automatically selects electronic delivery over paper wherever possible**
- Increase the speed and reliability of delivery: **remove the reliance on paper and post**

How does it work?

WinBacs:Docs is designed to take standard output from your ERP, business application or finance system. Instantly turn bland and difficult to understand finance documents into a more professional, richly formatted document.

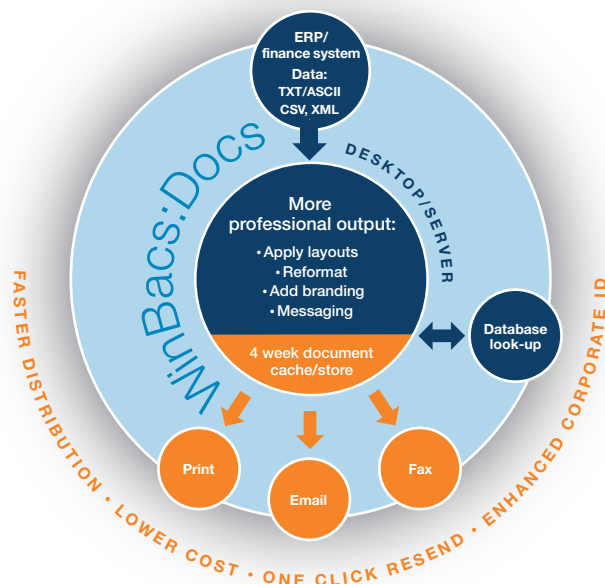

Documents are easier to read and understand, easier to action without queries and shout that they are from a professional company. Get faster responses from your suppliers or customers and reduce Days Sales Outstanding with clearer documents produced by WinBacs Docs.

You will benefit from improving the quality of all the documents generated by your ERP or finance system, for example:

- Remittance Advice
- Invoices
- Purchase Orders
- Statements
- Dunning Letters

WinBacs:Docs is designed to be a complimentary solution for existing WinBacs users and can work with any ERP or finance system.

Cost savings over 12 months for a company producing 200 documents

	Current	WinBacs:Docs
Document volume	2,400	2,400
Percent emailed	0%	65%
