

FormScape V3.3 New Features

COURSE OBJECTIVE

This course will examine FormScape V3.3 and its new product features in the areas of software administration, branch file development and DocsOnline. Students will learn the differences between the new version and the previous version of FormScape software.

COURSE DESCRIPTION

The FormScape V3.3 software provides enhanced features in regards to the administration of the software, the creation and maintenance of branch files and the utilization and management of DocsOnline. This course offers an overview of the improvements and changes incorporated into this new release, which will be demonstrated throughout the course. Students will have the opportunity to work with the enhanced product features and familiarize themselves with the procedural changes through the use of hands-on exercises.

WHO SHOULD ATTEND?

Anyone currently using FormScape V3.x software wishing to upgrade and use FormScape V3.3 software should attend this course.

WHAT DO I NEED TO KNOW BEFORE COMING TO CLASS?

Experience using the FormScape Developer module to develop projects for a production environment and skills in FormScape software administration are essential for this course. Familiarity in managing and utilizing DocsOnline is an advantage.

PRE-REQUISITE FORMSCAPE COURSES

Delegates must have a good working knowledge of developing FormScape projects and administering the software installation. Students should have previously attended the Practical Introduction to FormScape Project Development course and the Administration of FormScape Software course or possess an equivalent level of understanding and experience.
